PROJECT FACT SHEET February 28, 2007

PROJECT: Kinnickinnic River, Wisconsin Section 206 Aquatic Ecosystem Restoration Project

DESCRIPTION: The project consists of removing two (2) drop structures and approximately 11,075 feet of an existing concrete channel lining from downstream of 27th Street to just past 6th Street in Milwaukee, Wisconsin. The Kinnickinnic River watershed has a drainage area of approximately 31.8 square miles and eventually flows into Lake Michigan. The proposed project would restore the Kinnickinnic River channel to a more natural stream condition with meanders, shelter areas, and riffle pool complexes. Rocky and deeper water areas would be created in order to provide refuge for fish to feed and rest from predators, extreme currents, and summer sun. The removal of the drop structures would also improve upstream passage for spawning.

CONGRESSIONAL INTEREST: Moore (D) WI-04, Feingold (D), Kohl (D)

LOCATION MAP & PICTURE:

NON-FEDERAL PROJECT SPONSOR: Milwaukee Metropolitan Sewerage District, Milwaukee, Wisconsin.

POC: Dave Fowler 414.277.6368

PROJECT AUTHORITY: Section 206 of the Water Resources Development Act of 1996.

FUNDING:

	<u>Total</u>		_	<u>Federal</u>	Non-Federal	
Current Working Estimate	\$	TBD	\$	TBD	\$	TBD
Funds Allocated prior to FY07	\$	0	\$	0	\$	0
Funds allocated in FY07	\$	0	\$	0	\$	0
FY08 Budget	\$	0	\$	0	\$	0
Funds that could be used in FY08	\$	100,000	\$	100,000	\$	TBD
Funds required to complete (> FY08)	\$	TBD	\$	TBD	\$	TBD

STAGE: Feasibility

STATUS: Because of budget constraints within the Section 206 program, this project is currently on hold. FY08 funding would be used to initiate the Feasibility Phase.
